### Story Design Overview

The little girl named **Tina** is suffering from **epilepsy**. She was appointed a doctor named **Rio** who is helping her get to know what epilepsy is. Since Tina is not too old to understand complex scientific terminologies and Rio doesn't want to stress her by explaining everything. So, he decided to explain to her in a very easy way so that she wouldn't feel any kind of stress and understands what's going on with her.

At the start, Tina asks Rio about what epilepsy is. He answers her that it's when the **brain** has mix-up of signals which causes seizures. In the same way, she goes on asking different questions about the brain and Rio keeps answering them.

Rio explains to her about the brain, using a brain model. She gets happy as she knows about the brain's functionality.

### 3. 3D Characters

#### The Patient

**Name:** Tina

**Age:** 9

**Personality:** Curious, Quick Lerner

# The Doctor

**Name:** Rio

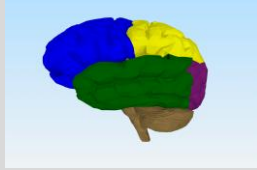

**Age:** 27

**Personality:** Kind, Patient

## 3.1. 3D Model Capabilities

### 3D Brain

---

**Ability:** Rotation 360°, Parts separation, **ZoomIn**

**Mobility:** To the middle of screen.

**Expandability:** up to 3x of original size.

### Tina

---

**Ability:** Speaks

**Mobility:** Stays at same place

## Rio

---

**Ability:** Speaks

**Mobility:** Stays at same place

## 4. Environment

### Environment:

**Type:** Image Target

**Location:** Hospital

**Theme:** Animated Cartoon

**Time:** morning

## 5. Player Controls

Scan the QR Code using Mobile App, the characters will automatically appear on the phone's screen. Their moveme

## 7. Sound and Dialogues
